

25-27 November 2016 | Gdańsk POLAND

About:

Academic Students' Society of Biotechnology (ASSB) associates biotechnology students and enthusiasts around the Country since 1999. Organization is focused on sharing different points of view and getting benefits of working in international team. Its main goal is to find creative solutions for multi-dimensional problems of 21st century.

On behalf of ASSB we are honored to invite you to 18th annual science conference this year's edition under the name "BioChemMed Session" will be held in Gdańsk, Poland from 25th to 27th of November.

The Conference gives a great opportunity to increase your knowledge in many branches of science associated with biotechnology, chemistry and medicine including pharmacy, molecular biology and genetic engineering. World-class professors as well as postgraduate students and adept university students will spread their great knowledge and experience while delivering high quality lectures. If you would like to join our team of speakers, please contact us via mail at bcm.assb@gmail.com
